

Hot-rod your Strobe Slipper™ with our bitchin' new billet-aluminum Softbox Ring Connector.

The Missing Link™

Bruce Dorn's Billet Aluminum **Softbox-Ring Connector** for the Strobe Slipper.

Not a generic piece like the PhotoFlex Adjustable Shoe Mount, the Missing Link™ is custom-designed to work perfectly with the Strobe Slipper™.

Say Goodbye to “flex” between Slipper and Softbox Ring! The Missing Link™ is rock-solid. Use the Missing Link’s extra-tough ¼-20 mounting-point and see an instant improvement in “tilt balance” when stand-mounting your Slipper and a heavier softbox.

“The Missing Link™” – is computer-milled from a solid billet of #6061 aluminum and black-anodized to compliment your Slipper. Two ½” by 1/4 -20 hex mounting screws are included.

*** Compatible with Softbox Rings from Photoflex & Chimera.**
